DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Sarkar et al. (US 5,846,089).

With respect to claims 1-2, Sarkar et al. show in Fig. 5 a cross-flow fan 46 for a discharge excitation gas laser to circulated laser gas between electrodes disposed within a laser chamber in which laser gas is circulated, comprising a hollow cylindrical fan body with side plates, a plurality of blades disposed in a circumferential array and extending axially between the side plates, and a rotating shaft connected to the side plates for rotating the fan body, wherein the rotating shaft of the cross-flow fan passes through the center of the fan (col. 3, lines 21-40).

With respect to claims 3-4, Sarkar et al. show in Fig. 5 the outer diameter of the cross-flow fan 46 D and the outer diameter of the rotating shaft d 130 are sized clearly with the relationship $d/D \geq 0.13$.

Response to Arguments

Applicant's arguments filed 11/13/03 have been fully considered but they are not persuasive.

Applicant argues "...the fan of the Sarkar patent does not show the fan shaft as passing through the body of the fan...and the ration d/D value". The examiner does not concur. The Sarkar figure 5 clearly shows the cross section of the fan 46 with a shaft 130 passing through the fan (see col.2, l.63-65). Further, the Sarkar figure 2 also shows the fan 46 with a shaft passing through the fan. Additionally, the ration d/D value is not patentable and furthermore, in Fig.2, the ration d/D is $3\text{mm}/14\text{mm} = 0.21$ which meets the limitation of claims 3-4.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
